

SYED HAMMAD ALI

AI AUTOMATION & OPERATIONS SPECIALIST | FRONTEND DEVELOPER | WORKFLOW
& DATA MANAGEMENT

MY PORTFOLIO

CORE SKILLS

Operations & Coordination

- Project & Task Tracking
- Workflow Management
- Data Organization
- Documentation
- Inventory Tracking
- Order & Status Tracking
- Attention to Detail
- Deadline Management

Spreadsheets & Data

- Google Sheets
- Microsoft Excel
- Formulas & Calculations
- Multi-tab Workbooks
- Budget Tracking
- Data Validation
- Reporting

AI & Automation

- ChatGPT
- AI-assisted Data Organization
- n8n
- Make.com
- Zapier
- Workflow Automation
- AI Prompting
- Process Optimization

Project & Communication Tools

- ClickUp
- Zoom
- Gmail
- Google Drive

Technical Background

- JavaScript
- React.js
- Next.js
- Firebase
- WordPress
- REST APIs
- Git/GitHub

SUMMARY

AI Automation & Operations Specialist with experience supporting technology projects, organizing complex workflows, managing structured data, and solving operational problems using modern digital tools. Skilled in AI tools including ChatGPT and automation platforms such as n8n, Make.com, and Zapier, with a strong technical background in web development and database-driven applications. Detail-oriented and comfortable working with spreadsheets, project trackers, documentation, and multiple tasks simultaneously. Experienced in remote collaboration, troubleshooting, and independently moving projects forward while maintaining accuracy and deadlines. Quick to learn new systems and processes and interested in applying technology and AI to improve operational efficiency.

EXPERIENCE

ASSOCIATE SOFTWARE ENGINEER— ASTUTE TECHNOLOGY

(March 2025 To May 2026)

- Managed multiple projects simultaneously while tracking requirements, tasks, deadlines, and deliverables.
- Organized project information and maintained structured documentation to keep work accurate and easy to track.
- Coordinated with team members to clarify requirements, identify blockers, and ensure tasks were completed on schedule.
- Used structured data, databases, and spreadsheets to organize project information and support business workflows.
- Investigated problems, identified root causes, and proposed practical solutions independently.
- Used AI tools to accelerate research, documentation, troubleshooting, data organization, and repetitive tasks.
- Worked remotely and communicated progress, issues, and completed deliverables with team members.

ADDITIONAL EXPERIENCE

PHARMACY / INVENTORY OPERATIONS - AZLAN HOSPITAL

(Jan 2021 To Continue)

- Managed inventory records and monitored stock levels.
- Worked with POS and administrative systems.
- Maintained accurate records and handled day-to-day operational tasks.
- Identified inventory gaps and coordinated replenishment.

EDUCATION

ADP (COMPUTER SCIENCE)

Islamia University Bahawalpur

2024 – 2026

AI AUTOMATION

Rohi eSkills Learning Hub

June 2026 – August 2026

PROJECTS

AI AUTOMATION PROJECTS

AI LEAD MANAGEMENT SYSTEM – N8N / AI AUTOMATION

- Built an AI-powered workflow to capture, process, organize, and manage lead information automatically.
- Automated lead handling using workflow logic, AI processing, and structured data management.
- Designed automated routing and follow-up processes to reduce repetitive manual work.
- Used AI to analyze incoming information and support faster, more consistent lead management.
- Integrated automation steps to move data between services and maintain an organized workflow.

AI-POWERED MEETING TRANSCRIPT AUTOMATION SYSTEM – N8N

- Built an automated workflow to process meeting transcripts and convert unstructured meeting information into organized outputs.
- Used AI to analyze meeting conversations and identify important information, action items, and follow-up requirements.
- Automated transcript processing to reduce manual note-taking and improve information organization.
- Designed an n8n workflow connecting multiple automation steps for consistent processing and reporting.
- Demonstrated the use of AI to turn meeting data into actionable, structured information.

AI WHATSAPP CUSTOMER SUPPORT AGENT – N8N / AI AUTOMATION

- Built an AI-powered WhatsApp customer support workflow to handle incoming customer queries automatically.
- Used AI to understand customer messages and generate relevant responses.
- Automated repetitive customer-support tasks to improve response speed and consistency.
- Designed workflow logic for processing incoming messages and generating automated responses.
- Applied AI prompting and automation techniques to create a structured customer communication process.

SELECTED OPERATIONS & AUTOMATION PROJECT

PROPERTY SETUP & PROCUREMENT TRACKER – SELF-BUILT SAMPLE PROJECT

- Built a structured multi-tab Excel system to manage property inspections, materials, budgets, procurement, deliveries, and inventory.
- Created room-by-room inspection tracking with required quantities, current quantities, condition, priority, and action items.
- Developed a tiered materials plan covering Essentials, Optimization, and Design items with quantities, vendors, costs, and approval status.
- Implemented formulas for automatic cost calculations, budget monitoring, order tracking, and inventory reorder requirements.
- Designed a procurement tracker to monitor vendors, order status, tracking numbers, expected delivery dates, receipts, invoices, and returns.
- Added data validation, status controls, and dashboard reporting to improve accuracy and visibility across the workflow.
